BEL CONFERENCE CENTER
Site de Tour & Taxis, 86 C avenue
du Port/3002, 1000 Brussels

1st European Technical Days dedicated to aging,
chemical compatibility and eco-design of
energetic materials and pyrotechnic systems

MSIAC
Munitions Safety Information Analysis Cen

Co-organized by AF3P¹ and GTPS² with the support of MSIAC³, these Technical Days are for the first time opened to european participation and contribution. Focused on major and intersectional topics in all developments of new energetic materials and pyrotechnic products.

The objective of these days is to present and exchange around the methods and technical approaches used by the different companies and laboratories in the selected fields.

At the heart of our pyrotechnic culture, the industry is faced with the requirement of complex systems with an extended product lifetime and a proliferation of environmental regulations.

At a time when our sector is renewing itself, strongly linked to environmental and technological issues, aging, chemical compatibility and eco-design of energetic materials and pyrotechnic systems proposed

for these first Technical Days are becoming key topics.

Today, collaboration between companies and governmental representatives is more necessary than ever, to enable us to promote and share our knowledge and skills.

Conferences and discussions will be on the agenda of this 1st edition.

1. French Pyrotechnics Association
2. French Working Group dedicated to Pyrotechnic Equipments for Defence and Space
3. Munitions Safety Information Analysis Center

KEY DATES

January 2025
Launching

March 2025
Call for papers
Registrations*

June 2025
Agenda

October 2025
Technical days

* Event limited to 150 people

WHO ARE WE ?

The GTPS, as the learned society of the French Pyrotechnics Association (AF3P), aims at promoting exchanges between the different member companies and organizations, and to contribute to the outreach of Pyrotechnics.

The GTPS helps creating links between the different companies and governmental organizations in the field of pyrotechnics and energetic materials in the military, civil and space sectors.

The GTPS acts in concert with its counterparts in the field of standardization and methodology.

GTPS produces guides, collections of current knowledge for the benefit of the pyrotechnic community, thanks to joint work led by experts belonging to the various french member companies of the GTPS and gathered around common interest subjects such as : Safety and transport, Reliability, Initiation of pyrotechnic systems, Eco-design, Machining, Aging of materials, Training.

MEMBER COMPANIES OF THE GTPS

COMMISSIONS OF THE GTPS

- AGING commission
- MACHINING commission
- RELIABILITY commission
- SAFETY and INTELLIGENTE INITIATION commission
- SAFETY – TRANSPORT commission
- ECO-DESIGN commission
- TRAINING commission
